

LIVE FIRE

Live fire cooking is the ultimate mastery of temperature control which is the foundation of cooking to manipulate texture and flavour. The depth of flavour is amplified, and it's way more fun.

LOCALLY-GROWN INGREDIENTS

Cuisine of Chef Rick will showcase locally-grown ingredients, wood fire techniques and a zero-waste approach to food by offering dishes that are nutritious, balanced and follow the group's philosophy of
"Dine Good Do Good"

ZERO-WASTE CUISINE

By necessity, we consider sustainability first and foremost in all our work in every decision at the restaurant, and our goal is to exert the absolute minimal impact upon earth, including breaking down our waste with zero carbon footprint and creating organic compost that is used in our farm.

By doing this, we are creating a closed loop where waste is used at the farm, which in turns will help to grow the ingredients used in our menu.
